## • Feedback

✓ France: a place in Europe with low harmonization of selective collection schemes

### – Main collection schemes :

- Commingled collection : 70% of French population
- All packaging / graphic papers : 20% of French population
- Fibrous / Non Fibrous : 7% of French population

### – Harmonization of colours of containers in progress

- Mainly yellow for commingled and for packaging selective waste stream
- Mainly bleu for paper or paper & board selective waste stream

✓ not the same quality requirement

- history of the collection system
- recycling plant

## • Feedback

- ✓ information sharing with the others collectivities in Europe
  - Trivalis good performances in France
    - ↳ difficulties to mobilize partners / collectivities in Trivalis
    - ↳ workshops for municipalities – application of the feedback postponed to a later date
  - reconsideration of the **collection** system / consolidate some decisions
  - expansion the network of contacts
